

WES HENDERSON

STAFF SYSTEMS ENGINEER

whendersonii@gmail.com
(210) 589-0628

Summary

Automation-focused Systems Engineer with 10+ years of experience in designing, integrating, and optimizing scalable infrastructure in cloud-native environments. Strong Linux advocate with deep technical acumen in automation, DevOps, and systems architecture. Skilled in mentoring, documentation, and fostering cross-functional collaboration. Proven ability to deliver innovative solutions that drive cost savings, reduce incident response times, and elevate organizational resilience.

Skills

DevOps	Helm	Team Leadership
Troubleshooting	AWS	Documentation
Research	GCP	Communication
Problem Solving	GitHub	Adaptability
CI/CD Pipelines	Terraform / CloudFormation	Generalist
Configuration Management	Ansible / Chef / Puppet	Cross-Functional Collaboration
Monitoring	Docker	Python
Infrastructure as Code (IaC)	Apache	Bash
Microservices	Nginx	PowerShell
Containerization	MySQL	Automation
Incident Response	Grafana	REST APIs
Linux	Splunk	boto3
Kubernetes (EKS & GKE)	Mentoring	Fabric

Relevant Experience

Salesforce

November 2019-April 2025

Lead Systems Engineer

- Spearheaded the 'Bring Your Own Key' (BYOK) initiative, securing \$6M in recurring revenue and satisfying key enterprise customer requirements.
- Discovered and resolved critical cloud misconfigurations, saving \$3M annually in AWS infrastructure costs.
- Orchestrated the onboarding of multiple business units to Kubernetes with zero service disruptions.
- Designed and implemented an extensible CLI tool for managing asynchronous jobs, significantly reducing MTTR and boosting operational visibility.
- Developed a reusable SRE tooling pipeline that reduced tribal knowledge dependencies and improved incident recovery workflows.
- Facilitated alignment and collaboration across multiple teams to deliver infrastructure projects on time and within budget.
- Led incident response and resolution efforts during on-call rotations.
- Investigated and remediated system vulnerabilities.

TrueAbility

February 2018-November 2019

Deployment Engineer

- Designed and launched custom exams for major clients including Google, Elastic, Chef, SUSE, Linux Foundation, and VMWare.
- Fully automated the provisioning and grading of exam environments across diverse tech stacks, rapidly adapting to client needs.
- Supported pre-sales efforts by answering technical inquiries and delivering customized product demonstrations tailored to client needs.
- Owned all post-sale account management activities, serving as the primary point of contact to drive customer success, retention, and growth.
- Expanded company offerings into recruitment-focused products.
- Mentored junior engineers and built documentation/playbooks, reducing escalations and supporting career development within the team.
- Wrote Ansible playbooks and brought all internal infrastructure under configuration management.
- Contributed to the internal codebase for exam delivery and associated tooling.

Rackspace Hosting

May 2013-December 2017

DevOps Engineer

- Delivered 2–3 custom AWS deployments per week, adhering to compliance standards (e.g., PCI, HIPAA).
- Authored a Python-based automation framework to accelerate builds, cutting deployment failure rates in half.
- Enhanced customer satisfaction by creating custom tools in Bash and Python that streamlined onboarding and troubleshooting.
- Supported knowledge sharing through active contributions to internal wikis and public blog content.
- Acted as a technical liaison to educate clients on distributed systems and DevOps best practices.

Certifications

AWS Certified Solutions Architect	2017	AWS-ASA-29789
Red Hat RHCE	2016	130-119-274
Red Hat RHCSA	2013	130-119-274
Linux Professional Institute Cert 1	2012	LPI000250530
CompTIA Linux+	2012	COMP001007825623
CompTIA Security+	2010	COMP001007825623
CompTIA Network+	2010	COMP001007825623
CompTIA A+	2008	COMP001007825623

Education

Northwest Vista College - San Antonio, Texas

Associate of Applied Science in Computer Forensics — **4.0 GPA**

- Marketable Skills Achievement Award: Linux RHCT
- Marketable Skills Achievement Award: Information Security & Assurance

-

*Volunteer
Work*

Huebner Elementary School

Tech Educator

September 2023-Present

- Lead classroom 3D printing demonstrations.
 - Conduct Internet safety classes.
 - Design and print 3D awards/merch for the school.
