

WES HENDERSON

STAFF SYSTEMS ENGINEER

whendersonii@gmail.com
(210) 589-0628

Summary

Automation-focused Systems Engineer with 10+ years of experience in designing, integrating, and optimizing scalable infrastructure in cloud-native environments. Strong Linux advocate with deep technical acumen in automation, DevOps, and systems architecture. Skilled in mentoring, documentation, and fostering cross-functional collaboration. Proven ability to deliver innovative solutions that drive cost savings, reduce incident response times, and elevate organizational resilience.

Skills

CI/CD Pipelines	Helm	Incident Response
Automation	Terraform	Root Cause Analysis
Configuration Management	CloudFormation	Technical Research
Infrastructure as Code (IaC)	Ansible	Troubleshooting
Immutable Infrastructure	Chef	Problem Solving
Microservices	Puppet	Mentoring
Containerization	Docker	Documentation
Jenkins	Apache	Communication
ArgoCD	Nginx	Adaptability
GitHub Actions	MySQL	Generalist
Linux	PostgreSQL	Cross-Functional Collaboration
Kubernetes (EKS & GKE)	Grafana	Python
AWS	Prometheus	Bash
GCP	Splunk	PowerShell

Relevant Experience

Salesforce

November 2019-April 2025

Lead Systems Engineer

- Spearheaded the 'Bring Your Own Key' (BYOK) initiative, securing \$6M in recurring revenue and satisfying key enterprise customer requirements.
- Discovered and resolved critical cloud misconfigurations, saving \$3M annually in AWS infrastructure costs.
- Orchestrated the onboarding of multiple business units to Kubernetes with zero service disruptions.
- Designed and implemented an extensible CLI tool for managing asynchronous jobs, significantly reducing MTTR and boosting operational visibility.
- Developed a reusable SRE tooling pipeline that reduced tribal knowledge dependencies and improved incident recovery workflows.
- Facilitated alignment and collaboration across multiple teams to deliver infrastructure projects on time and within budget.
- Led incident response and resolution efforts during on-call rotations.
- Investigated and remediated system vulnerabilities.

TrueAbility Deployment Engineer

February 2018-November 2019

- Designed and launched custom exams for major clients including Google, Elastic, Chef, SUSE, Linux Foundation, and VMWare.
- Fully automated the provisioning and grading of exam environments across diverse tech stacks, rapidly adapting to client needs.
- Supported pre-sales efforts by answering technical inquiries and delivering customized product demonstrations tailored to client needs.
- Owned all post-sale account management activities, serving as the primary point of contact to drive customer success, retention, and growth.
- Expanded company offerings into recruitment-focused products.
- Mentored junior engineers and built documentation/playbooks, reducing escalations and supporting career development within the team.
- Wrote Ansible playbooks and broght all internal infrastructure under configuration management.
- Contributed to the internal codebase for exam delivery and associated tooling.

Rackspace Hosting DevOps Engineer

May 2013-December 2017

- Delivered 2–3 custom AWS deployments per week, adhering to compliance standards (e.g., PCI, HIPAA).
- Authored a Python-based automation framework to accelerate builds, cutting deployment failure rates in half.
- Enhanced customer satisfaction by creating custom tools in Bash and Python that streamlined onboarding and troubleshooting.
- Supported knowledge sharing through active contributions to internal wikis and public blog content.
- Acted as a technical liaison to educate clients on distributed systems and DevOps best practices.

Certifications

AWS Certified Solutions Architect	2017	AWS-ASA-29789
Red Hat RHCE	2016	130-119-274
Red Hat RHCSA	2013	130-119-274
Linux Professional Institute Cert 1	2012	LPI000250530
CompTIA Linux+	2012	COMP001007825623
CompTIA Security+	2010	COMP001007825623
CompTIA Network+	2010	COMP001007825623
CompTIA A+	2008	COMP001007825623

Education

Northwest Vista College - San Antonio, Texas

Associate of Applied Science in Computer Forensics — **4.0 GPA**

- Marketable Skills Achievement Award: Linux RHCT
- Marketable Skills Achievement Award: Information Security & Assurance

*Volunteer
Work*

Huebner Elementary School
Tech Educator

September 2023-Present

- Lead classroom 3D printing demonstrations.
 - Conduct Internet safety classes.
 - Design and print 3D awards/merch for the school.
